THE REASONS FOR ALLOWANCE

The applicant's response filed 12/20/05 to the Office action has been entered. Claims 6 and 18 are pending.

1. The following is an examiner's statement of reasons for allowance:

Concerning claims 6 and 18, no prior art has been found teaching or suggesting a method of stabilization of a physiologically active peptide in a process of preparing a powder containing the physiologically active peptide wherein the process comprises adding to an aqueous liquid at least one compound selected from the group of a nonionic organic, water soluble binder, and hydrogenated lecithin and wherein the nonionic organic, water soluble binder is selected from polyvinylpyrrolidone, a water-soluble, nonionic cellulose derivative and polyvinylalcohol and wherein the water-soluble, nonionic cellulose derivative is selected from the group of hydroxypropylcellulose, hydroxyethylcellulose and hydroxypropylmethylcellulose.

The closest prior art is the reference of Bergstrand et al. (6,103,697, issued August 5, 2000). Bergstrand et al. disclose the preparation of pharmaceutical preparation containing a peptide (See column 12, lines 56-57). The active peptide may be admixed with mannitol, or cellulose derivatives or polyvinylpyrrolidone (See column 12, lines 56-67) and surfactants lecithin (see column 13, lines 53-55). A solution containing active peptide was dried by lyophilization (See example 34, column 9, lines 58-60). However, there is no teaching or suggestion that the water-soluble, nonionic cellulose derivative selected from the group of hydroxypropylcellulose, hydroxyethylcellulose and hydroxypropylmethylcellulose was added to the preparation containing the peptide.
